party intermediaries.

Event Tracking and User Identification: With Segment's Actions-based destination, you can keep track of events and identify users and organizations in Hyperengage.

Getting started

1. From the Segment web app, navigate to **Connections > Catalog**, then select **Destinations**.
2. In the Destinations Catalog, search for "Hyperengage" and select the Hyperengage (Actions) destination.
3. Click **Add destination**.
4. Choose an existing source to connect to Hyperengage (Actions) and click **Next**.
5. Enter a name for your destination and click **Create destination**.
6. Open the Hyperengage App, proceed to **Integration Settings**, and copy the API Key and Workspace Identifier.
7. Open the Segment app, navigate to your Hyperengage (Actions) destination, and paste the API Key and Workspace Identifier into the destination's settings page.

Available Actions

Build your own Mappings. Combine supported triggers with the following -supported actions:

Mapping limits per destination

Individual destination instances have support a maximum of 50 mappings.
