Getting Started

All you need in order to integrate with Rockerbox is your pixel code, which you can get by emailing info@rockerbox.com.

Page

When you trigger a `.page()` call, we will fire `window.RB.track('view')` and pass your page properties, including any custom properties outside of url, path, title, etc.

Track

Rockerbox can accept any custom `.track()` events and properties.

Settings

Segment lets you change these destination settings from the Segment app without having to touch any code.

SETTING	DESCRIPTION
Custom Tracking Domain	<code>string</code> . Load trackers and pixels from specified domain https://help.rockerbox.com/docs/cname-integration
Enable Cookie Sync	<code>boolean</code> , defaults to <code>FALSE</code> . Enable cookie sync between their domain and Rockerbox. Depending on the data a company sends to Rockerbox, this may be necessary to adhere to CCPA regulations. More info here: https://help.rockerbox.com/docs/segment-pixel-implementation
Pixel Code (required)	<code>string</code> . Please enter your Hindsight Pixel Code. You can find this inside Hindsight's provided snippet. It is the value being passed into the <code>RB.initialize()</code>
