Help

`event_name (event_name)`

• `email (email)`

• `gender (gender)`

• `userID (userID)`

All other traits will be sent to Framed as custom attributes.

Track

When you track an event, we will send that event to Framed as a user event. Events must have the following:

• `userID (userID)`

• `event_name (event_name)`

• Any properties of the event will be passed onto Framed as custom properties of the event itself.
