Help

Arello-like management interface for taking care of the issues. The `analytics.js` BugHerd Destination is open-source. You can browse the code [on GitHub](#).

Getting Started

1. From the Segment web app, click **Catalog**.
2. Search for "BugHerd" in the Catalog, select it, and choose which of your sources to connect the destination to.
3. In the destination settings, enter your **API Key** as retrieved from the Install BugHerd tab on your BugHerd Project page.
4. Your changes appear in the Segment CDN in about 45 minutes, and then Analytics.js starts asynchronously loading BugHerd onto your page. This means you should remove BugHerd's snippet from your page.
5. The BugHerd Destination doesn't use any Segment API calls (e.g. identify, track, etc) so, once it's loaded, it's good to go! Your BugHerd sidebar will begin appearing for your team.

Settings

Segment lets you change these destination settings from the Segment app without having to touch any code.

SETTING	DESCRIPTION
API Key <i>(required)</i>	<code>string</code> . You can find your API Key under the Install BugHerd tab on your BugHerd Project page . It will appear in your tracking code as <code>?apikey=...</code>
Show the Default Feedback Tab	<code>boolean</code> , defaults to <code>TRUE</code> . You should only disable this setting if you want to build your own feedback tab with the BugHerd API.
