across all stages of product development through unmoderated tests, participant recruiting, and powerful in-product surveys.

Hubble maintains this destination. For any issues with the destination, view Hubble's documentation or contact Hubble Support.

> ✅
> **Analytics.js 2.0**
>
> Actions-based destinations may require features found in Analytics.js 2.0. If the destination has Web actions and is connected to a javascript source, upgrade your Analytics.js source to ensure compatibility.

Getting started

1. From the Segment web app, click **Catalog**, then click **Destinations**.

2. Search for "Hubble (Actions)" in the catalog.

3. Choose a source you would like to connect this destination to.

4. Find your Hubble ID in Hubble App by navigating to **Account Settings > Integrations > Segment**.

5. Enter your Hubble ID into the **id** field in the Segment web app.

Destination Settings

SETTING	DESCRIPTION
id	*Required*. Unique identifier for your team (given in Hubble app)

Available Presets

Hubble (Actions) has the following presets:

PRESET NAME	TRIGGER	DEFAULT ACTION
Track event	Event type = "track"	Track
Identify user	Event type = "identify"	Identify

Available Actions

Build your own Mappings. Combine supported triggers with the following Hubble-supported actions:

> ℹ️
> **Mapping limits per destination**
>
> Individual destination instances have support a maximum of 50 mappings.
