For webhooks and S3 integrations, you can differentiate sources by the source id.

Write Key

Use this write key to send data to this source from our partners, plugins, libraries or REST API.

📋 Copy   ✕ Revoke

Generate New Key

Now you can add the source's write key to your app and begin sending data to Segment.

Locate a source using your write key

To find the source given a write key within your workspace, open your workspace and select the search icon. Enter your write key into the search bar. If the write key exists in the workspace and is connected to a source, the source shows up in the list of results.
